

Dear FCC representative,  
I totally disagree with the NAB's position to limit the broadcasts of XM Radio. As a paying customer I demand that the content be regulated by XM Radio and its paying listeners. If the Broadcasting Assoc is worried about thier listenership maybe they should have invested more money in bring thier systems up to par. We live in a capitalist society and its our right to chose what we want to hear, We have the right to demand from those individuals we pay the content we listen to. This includes traffic and weather. Please reject NAB's petition 04-160.

Respectfully,

Javier Sanchez
